

Important Notes

The QUS-20 is a basic stand made for temporary use and is not mean to be left on the bicycle as a permanent solution. Breaking this seal means you understand and accept the terms and conditions. Placement is at the sole discretion of Minoura.

How To Use QUS-20

Install on the outside of the leftside chain-stay with the quick release skewer for the rear wheel.

The kickstand will be locked by tightening the quick release skewer.

Loosening the skewer will release the locking of the stand. You need to adjust the kickstand angle every time you loose the skewer.

The leg should be positioned 15 degrees forward. Narrower angle should weaken the stability, and greater angle may cause bike falling down accident due to the load. Keep it in proper angle.

This kickstand does not have leg locking mechanism.

The leg is NOT length adjustable.

Choose appropriate leg size version.

Warranty Period : 1 year
